SKILLS

- **Languages**: Python, C, C++, Java, SQL
- **Frameworks**: Pandas, NumPy, Seaborn, Matplotlib, Py-torch, TensorFlow, Scikit-learn
- **Tools/Platforms**: Excel, Git, Tableau, Jupyter Notebook
- **Soft Skills**: Leadership, Collaborative, Problem solving, Adaptability, Project management, Resilient, Diligent

TRAINING

Lovely Professional University – Center for Professional Enhancement

Fundamentals of Data Structures: Jun'25 –Jul'25

- Acquired a solid understanding of **Java programming fundamentals** and **Object-Oriented Programming (OOP)** concepts.
- Implemented key **data structures** including Arrays, Linked Lists, Stacks, Queues, Trees, and Graphs.
- Applied **algorithms** such as Sorting, Searching, and Traversals to solve real-world programming problems.
- Strengthened **logical reasoning, coding efficiency, and analytical thinking** through regular problem-solving exercises.
- Completed multiple **hands-on projects and assignments** demonstrating practical application of data structure concepts.

PROJECTS

Adidas US Sales Analysis | *Pandas, Matplotlib, Seaborn, Python* May'25

- Conducted exploration data analysis (EDA) on Adidas US sales data to visualize total sales distribution by product.
- Utilized bar charts for clear representation of product-wise total sales, improving data-driven decision making.
- Applied Pandas for data manipulation and Matplotlib/Seaborn for insightful visualizations, enhancing sales understanding and growth rate of 70%
- Delivered visualizations enabling stakeholders to easily identify top-performing products and sales patterns.
- GitHub Link: https://github.com/Abhi12305323/python-project

Brick Breaker Game | *Python, Pygame* Jan'25

- Developed an interactive Brick Breaker game using Pygame, focusing on game mechanics like paddle control, ball physics, and brick collisions.
- Implemented multiple difficulty levels (Easy, Medium, Hard) with adjustable paddle and ball speeds to cater to different player skill levels.
- Designed gradient background, collision detection, scoring, and level progression enhancing the user experience.
- Built features like game pause, restart, and dynamic difficulty adjustment ensuring smooth gameplay and usability with success rate of 80%.
- GitHub Link: https://github.com/Abhi12305323/brick-baker

CERTIFICATES

- **Fundamentals of Data Structures**: *Center for Professional Enhancement (LPU)* June'25
- **C Language** – *Neo Colab* May'24
- **Python 101 for Data Science** – *Cognitive Class (IBM)* Apr'24
- **Python Programming** –*iHUB DivyaSampark, IIT Roorkee* Mar'24
- **Responsive Web Design** –*freeCodeCamp* Oct' 23

ACHIEVEMENTS

- **Leadership & Extra Curricular:** May'24
  Worked as a volunteer in NGO (Old Age Home), contributing towards social responsibility
- **Event Management:** Mar'23
  Did volunteering for a hackathon conducted under Coding Ninjas

EDUCATION

- **Lovely Professional University** Jalandhar, Punjab
  Bachelor of Technology - Computer Science and Engineering *Since Aug' 23-Present*
- **Aditya Junior College** Kakinada, Andhra Pradesh
  Intermediate; ***Percentage: 67%*** *Jun'22 – Mar'23*
- **Boon School** Kakinada, Andhra Pradesh
  Matriculation; ***Percentage: 84%*** *Jun'20 – Mar'21*
